The network diagram illustrates a multi-network environment. On the left, Network A (10.0.0.0/24) contains routers R1 and R2. R1 has interfaces e0/0 (10.0.0.94) and e0/1 (10.0.0.95). R2 has interfaces e0/0 (10.0.0.96) and e0/1 (10.0.0.97). On the right, Network B (192.168.200.0/24) contains router R3 and 12 PCs. R3 has interfaces e0/0 (192.168.200.196), e0/1 (192.168.200.197), and e0/2 (192.168.200.198). The PCs are connected to a central switch (Switch1) and have the following IP and MAC addresses: PC7 (192.168.200.089, 02:01:31:89:BB:07), PC8 (192.168.200.090, 02:01:31:89:BB:08), PC9 (192.168.200.091, 02:01:31:89:BB:09), PC10 (192.168.200.092, 02:01:31:89:BB:10), PC11 (192.168.200.093, 02:01:31:89:BB:11), PC12 (192.168.200.094, 02:01:31:89:BB:12), and three other PCs with IP addresses 192.168.200.095, 192.168.200.096, and 192.168.200.097.

```

NADA MUDOU!!!

EXISTE CONECTIVIDADE ENTRE TERMINAIS!!!

Mudança de propriedade DÁ para ser efetuada, mas não tem efeito!!

```
R2(config-if)#vrrp 1 priority 95
% Priority change will have no effect whilst interface is VRRP address owner
R2(config-if)#
```

(Após mudar o IP virtual para ser igual ao do R2 e.0/0, a prioridade (master) mudou para o R2 e estando nessa prioridade, não é possível desligar a preemption)

Conclusão:

Router que tiver o endereço físico igual ao endereço Virtual tem a prioridade máxima e não pode ser mudada porque se o Router 1 tiver o endereço ip 10.0.0.1, o Router 2 tiver o endereço 10.0.0.2 e ambos tiverem o 10.0.0.1 como endereço IP virtual o Router 2 se tiver maior prioridade que o Router 1 vai ser possível chegar ao Router 2 pelo endereço 10.0.0.1 mas como o Router 1 está operacional o endereço IP 10.0.0.1 pode ser usado para chegar ao Router 1 logo tens duplicação de endereços IP e perdes a possibilidade de fazer gestão remota ao equipamento.

A vantagem desta abordagem é que se tiveres muitos terminais com a default gateway 10.0.0.1 não tens de estar a mudar porque estás a usar o mesmo endereço para endereço IP virtual.

5-

O AVG é eleito a partir de quem tem maior prioridade e o AVF é eleito a partir de quem tem maior valor no weight.
